LIST OF AGENTS

Authorized to sell United Provinces Government Publications

Messrs. Gaya Prasad and Sons, Booksellers and Publishers and Stationers, Agra.

The Manager, English Book Depot, Taj Road, Agra Cantt.

Messrs. Lakshmi Narain Agarwal, Educational Publishers, Hospital Road, Agra.

Messrs. Rama Book Depot, University Booksellers, Sarai Hakim, Aligarh.

The Manager, Irshad Book Depot, Booksellers, etc., Aligarh.

Messrs. Kitabistan Booksellers, 17A City Road, Allahabad.

The Manager, Leader Press, Allahabad.

Messrs. Lala Ram Narain Lal, Booksellers, Bank Road, Allahabad.

Messrs. Rai Sahib Ramdayal Agarwal, 210 Katra Road, Allahabad.

The Secretary, North India Christian Tract and Book Society, 18 Clive Road, Allahabad.

The Managing Proprietor, Bhargawa Book Agency, 93 K. P. Kacker (Zero) Road, Allahabad.

Messrs. Shyamlal Hiralal Shah and Sons, Cloth and Metal Merchants and Agents, 90-91 The Mall, Almora.

The Proprietor, Rajputana Book House, Banthia & Co., Ltd., Station Road, Ajmer.

The Proprietor, London Book Depot, Booksellers, etc., Bareilly.

Messrs. The Vaish Book Depot, Booksellers and Publishers, 82 Darzi Chowk, Bareilly.

The Manager, The Indian Book Shop, Benares City.

Messrs. Nand Kishore and Brothers, Publishers and Booksellers, Chowk, Benares.

Messrs. Brij Bhushan Dass & Co., Booksellers, Publishers and Proprietor Benares Sanskrit Series, 49/15 Thatheri Bazar, Benares.

The Secretary, Chaukhamba Sanskrit Series Office, Benares City.

Messrs. New Book Company, Booksellers, etc., Kitab Mahal, 188—90 Hornby Road, Bombay.

Messrs. M. G. Bakshi, Law Book Agents, Yeotmal (Berar).

The Manager, Oxford Book and Stationery Co., 37/39 Park Street, Calcutta.

Messrs. Thacker Spink & Co., Publishers, 3 Esplanade Road, Calcutta.

The Manager, R. Cambray & Co., Kent House, P. 33 Mission Row Extension, Calcutta.

Messrs. S. K. Lahiri & Co., Ltd., Booksellers and Publishers, 54 College Street, Calcutta.

Messrs. Sampson William & Co., 127-B, The Mall, Cawnpore.

Messrs. Advani Brothers, Booksellers, News Agents and Stationers, P. O. Box no. 100, The Mall, Cawnpore.

The Proprietor, Kanoon Press, Cawnpore.

Messrs. Gautam Brothers & Co., Meston Road, Cawnpore.

Messrs. J. M. Jaina & Brothers, Booksellers, etc., Mori Gate, P. O. Box no. 76, Delhi.

The Manager, Ideal Book Depot, Booksellers, etc., Rajput Road, Dehra Dun.

Messrs. B. S. Mathur & Co., Contractor, Chaturvilas Paota, Civil Line, Jodhpur (Rajputana).

Messrs. Allies Stores, Booksellers and Stationers, Bunder Road, Karachi (Sind).

Messrs. Rai Sahib Gulab Singh & Sons, Government Printers and Publishers and Booksellers, Lahore.

Messrs. Mehar Chand Lachman Das, Oriental and Foreign Booksellers, Sail Milhor Bazar, Lahore.

Messrs. Ram Krishna & Sons, Booksellers, Anarkali Street, Lahore.

Messrs. Motilal Benarsi Das, Punjab Sanskrit Book Depot, Sail Milhor Street, Lahore.

The High Commissioner for India, Public Department (Publication Branch), India House, Aldwych, London, W. C. 2.

The Manager, Newal Kishore Press, Book Depot, Lucknow.

M. R. D. Kapil, Secretary, U. P. District Board Union, Chuhar Singh Buildings, Pan Dariba Road, Lucknow.

The Managing Director, The Upper India Publishing House, Booksellers, etc., Literature Palace, Lucknow.

Messrs. Lucknow Publishing House, Lucknow.

Messrs. Higinbothams, Mount Road, Madras.

Messrs. Prakash Educational Stores, Booksellers, etc., Near Tahsil, Meerut City.

The Mussoorie Book Society, Booksellers and Stationers, Mussoorie.

Messrs. Neston Jacques & Co., Booksellers etc., Kamptee, Nagpur.

Messrs. Raghunath Prasad and Sons, Agent Patna City.

The Manager, Oriental Book Agency, Shakrawar, Poona City.

The Manager, The International Bo[illegible] Service, Booksellers, Publishers and Ne[illegible] Agents, Deccan Gymkhana Colony, 4 Poon[illegible]

The Manager, Burma Book Club, Ltd., 64 Phayre Street, P. B. No. 1068, Rangoon.

ANNUAL REPORT

ON THE WORKING OF THE

FACTORIES ACT

IN THE

UNITED PROVINCES

For the year 1940

ALLAHABAD:
SUPERINTENDENT, PRINTING AND STATIONERY, UNITED PROVINCES, INDIA
1941

Annual Report on the Working of the Factories Act, 1934, in the United Provinces for the year 1940

I—Staff and Administration

THE undersigned held charge of the office of the Chief Inspector of Factories throughout the year.

Mr. Daljit Mansingh held the office of the Assistant Inspector of Factories. He was on leave from the 28th May to 27th June, 1940. No officiating arrangement was made during his absence.

2. Mr. B. S. Jaiman, Superintendent, Government Metal Working School, Aligarh and Mr. Arshad Husain, 1st Assistant Master, Government Technical School, Lucknow, were appointed as Boiler Inspectors and Additional Inspectors of Factories, United Provinces, on probation for two years. The former took over charge of post on the 27th November, 1940, and the latter on the 12th December, 1940.

These appointments have been made in consequence of the introduction of United Provinces Maternity Benefit Act, 1938, and the extension of the Factories Act to smaller concerns. Their main business is to administer these Acts but they have been designated as Inspector of Boilers and Factories so that they may carry out the work of Boiler Inspection also if and when necessary.

In March, 1940, Mr. M. K. Kidwai, Assistant Cane Commissioner, United Provinces (Labour), was appointed to be an *ex officio* Additional Inspector of Factories for all such sugar factories in the province as come under the purview of the United Provinces Sugar Factories Control Act, 1938 (I of 1938).

In April, 1940, the District Medical Officer of Health of the East Indian Railway, Lucknow, was appointed to be a Certifying Surgeon for the purposes of Hazardous Occupation (Lead) Rules, 1937 for the Railway employees.

In May, 1940, the School Health Officers who are also Certifying Surgeons for the purposes of the Factories Act, were declared as subordinate to the Civil Surgeons of their respective districts.

The Labour Commissioner, United Provinces was also notified as Additional Inspector of Factories, United Provinces, from the 15th August, 1940.

The term of appointment of Mrs. A. M. Shaw, Honorary Inspectress of Factories for Cawnpore was again extended for a further period of one year.

Five new clerks were also appointed to the Factory Inspection Office in view of the extension of the Factories Act.

3. New and amended rules 93 and 98 to 113 were enforced.

During the year a further addition was made in the schedule to rule 102 of the United Provinces Factories Rules, 1935, to provide for persons employed on certain continuous processes in Electric Steel Smelting

Furnaces and Rolling Mills (when working in conjunction with the aforesaid furnaces).

The factories notified on the 22nd May, 1940, under section 5 of the Act to cover seven classes of factories are being treated separately so as o have statistics readily available for such concerns. They have been desitnated as 'N' factories for the purposes of this report and a separate notg is given at the end of the report.

In the year under review an addition of Chapter VA was made to the existing Factories Act. This addition extended its scope to embrace small factories and workshops using power and employing between 10 and 20 persons, provided that any one or more of these workers has not completed his seventeenth year.

4. This Department has hitherto been under the control of the Director of Industries and Commerce, United Provinces, but in the year under report it was placed under the administrative control of the Labour Commissioner, United Provinces.

II—FACTORIES

5. During the year under report the total number of factories subject to the control of the Factories Act was 654 against 626 in the previous year; 58 factories were added to the register and 29 were removed and one was transferred from $2(j)$ register of Factories to 'N' Factories making a net increase of 28 factories or 4·5 per cent. against 3·3 per cent. in the previous year as shown below:

	1940	1939
Non-seasonal	464	418
Seasonal	190	208
Total ..	654	626

From the above statement it will be observed that the non-seasonal factories continued to increase whereas seasonal ones decreased by 18. This was due to a greater number of non-seasonal factories being registered and also to a few seasonal factories having been reclassified as non-seasonal during the year.

6. The following 58 factories, 56 non-seasonal and 2 seasonal were added to the register during the year under report:

District	Number of factories	Class of factories
Agra	11	6 Glass Bangle Factories, 2 Engineering Works, 2 Printing Presses, 1 Brush Factory.
Aligarh	2	1 Brass Works, 1 Printing Press.
Allahabad	3	1 Military Dairy, 2 Printing Presses.
Bareilly	1	1 Flour and Dal Mill.
Basti	1	1 Sugar Mill.

District	Number of factories	Class of factories
Benares	6	2 Engineering Works, 3 Printing Presses and 1 Gold thread and Kalabattu Factory.
Cawnpore	12	1 Cotton Waste Factory, 2 Chemical Works, 2 Engineering Works, 3 Tanneries, 1 Wood Works, 1 Rolling Mill, 1 Brush Factory, and 1 Printing Press.
Dehra Dun	1	1 Dairy Farm.
Etawah	1	1 Oil Mill.
Farrukhabad	3	2 Rolling Mills and 1 Oil Mill.
Gonda	4	2 Dal Mills, 1 Electric Generating Station, and 1 Sugar Factory.
Jhansi	2	1 Power House and 1 Oil Mill.
Lucknow	3	1 Hosiery Works, 1 Lime Mill, and 1 Motor Works.
Meerut	1	1 Straw Board Factory.
Moradabad..	2	1 Engineering Works and 1 Sugar Factory.
Muttra	1	1 Oil Mill.
Naini Tal	1	1 Oil Mill.
Saharanpur	1	1 Rice Mill.
Sitapur	2	1 Carpentry Works and 1 Engineering Works.

The new registrations comprised of 22 different industries, Printing Presses accounted for 9, Engineering Works 8, Glass Bangle Works 6, Oil Mills 5, Rolling Mills, Sugar Works and Tanneries accounted for 3 each; Brush Factories, Dairy Farms, Chemicals, Carpentry Works, Dal Mills and Electric Generating Stations accounted for 2 each, the other being spread over the remaining 9 industries.

The new registrations were spread over 19 districts as compared with 17 districts in the previous year, the greatest number (12) being in Cawnpore; Agra, Benares and Gonda had 11, 6 and 4 respectively, while Allahabad, Farrukhabad and Lucknow had 3 each. The remaining 12 districts had 1 to 2 each.

Twenty-seven of the factories registered during the year were new concerns and 31 old ones.

The registrations in 25 cases were voluntary and in the remaining 33 cases compulsory.

Three prosecutions were instituted by this Department for breach of Section 9 of the Act for not getting their factories registered.

7. The following 29 factories, 14 non-seasonal, 15 seasonal were removed from the register. One factory was transferred from the register of factories maintained under Section 2(*j*) to that maintained under Section 5(1) during the year under report :

District	Number of factories	Class of factories
Agra	6	4 Bangle Factories, 1 Running Shed and 1 Ginning Factory.
Allahabad	1	1 Military Dairy Farm.
Aligarh	1	1 Printing Press.
Azamgarh	1	1 Sugar Factory.
Bareilly	5	1 Cabinet Making Factory and 4 Sugar Factories.
Bijnor	1	1 Hosiery Works.
Cawnpore	2	1 Oil Mill and 1 Ginning and Press Factory.
Dehra Dun	1	1 Sugar Factory.
Etah	1	1 Ginning Factory.
Etawah	1	1 Ginning Factory.
Fyzabad	1	1 Sugar Factory.
Jhansi	1	1 Match Factory.
Lucknow	2	1 Iron Works and 1 Motor Works.
Meerut	1	1 Military Dairy Farm.
Moradabad	1	1 Ginning Factory.
Naini Tal	1	1 Printing Press.
Saharanpur	1	1 Sugar Factory.
Shahjahanpur	1	1 Sugar Factory.

Of the above 29 factories, 7 were removed for being closed for a number of years, 11 due to having been dismantled and machinery removed, 3 for being not in existence and 8 for not being "Factories" as defined in Section 2(*j*) of the Act. One factory was however transferred to 5(1) register for employing less than the requisite number of workers required under Section 2(*j*). The policy of removing redundant factories and factories which are not likely to work again or factories which have ceased to exist but about which the occupiers had not informed this office, from the register was maintained so as to have an accurate idea of the number of factories in the province.

8. The number of factories that worked for the last two years is as follows :

	1940	1939
Non-seasonal	434	392
Seasonal	144	154
Total ..	578	546

88·4 per cent. of the total number of factories worked against 87·2 per cent. in 1939.

15·2 per cent. of the working factories were connected with the cotton industry (Cotton Mills and Ginning and Press Factory) and 14·4 per cent. with the Sugar Industry.

Of the 578 factories that were in commission, annual returns were not received from 12 factories, and their particulars are therefore not included in statements nos. III, IV and V appended to this report, 10 of these were non-seasonal and 2 seasonal concerns.

Of the 76 factories that remained closed during the year, 30 were non-seasonal and 46 seasonal; of the latter 14 were sugar factories and 32 Cotton Ginning and Pressing Factories. Cotton Ginning Factories again experienced a comparatively dull working year. The number of Cotton Ginning and Pressing Factories that remain closed each year indicate that there are still more factories in this province than are necessary to deal with the available trade.

III—Employment

9. The average daily number of workers employed in the registered factories as obtained from the annual returns received was 179,735 against 159,738 in the previous year. Nearly 96·5 per cent. of this is adult male labour. Nearly 71·9 per cent. of the total number of workers were employed in non-seasonal factories and 28·1 per cent. in the seasonal concerns. The increase of 12·5 per cent. in the number of workers is mainly due to the registrations of new factories and some of the existing Cotton Mills, Woollen Mills, Leather and Shoes Factories and Ordnance and Army Clothing Factories employing a greater number of workers particularly owing to present emergency conditions.

Of 179,735 workers 3,361 were employed as detailed below in the additional factories registered during the year:

	Number of workers
Government and Local Fund Factories	70
Textiles	66
Engineering	199
Minerals and Metals	93
Food, Drink and Tobacco	1,031
Chemical Dyes, etc.	247
Paper and Printing	748
Wood Stone and Glass	518
Skins and Hides	242
Miscellaneous	147
Total	3,361

The number of workers employed in each class of factories is given in the statement below :

Class of factories	Number of workers			Causes of variations
	1940	1939	Increase or decrease	
Government and Local Fund Factories.	31,609	21,658	+9,51	The large increase is due to Army clothing and ordnance factories employing a greater number of workers due to War.
Textiles	54,884	53,155	+1,729	The increase is due to Cotton and Woollen Mills employing a greater number of workers due to War.
Engineering	8,399	7,708	+691	The increase is due to new registrations.
Minerals and metals ..	1,409	1,005	+404	Ditto.
Food, drink and tobacco ..	51,939	49,565	+2,374	Ditto.
Chemical and dyes, etc. ..	5,695	5,450	+245	Ditto.
Paper and printing ..	5,076	4,055	+1,021	Ditto.
Wood, stone and glass ..	7,037	5,766	+1,271	Ditto.
Skins and hides	7,497	4,444	+3,053	The increase is due to new registrations and some of the existing factories employing a greater number of workers due to War.
Gins and presses.. ..	5,438	6,566	−1,128	The decrease is due to nearly 38·1 per cent. of this class of factories not working during the year.
Miscellaneous	752	366	+386	The increase is due to new registrations.
Total ..	179,735	159,738	+19,997	

IV—Employment of Adolescents, Women and Children

10. The average daily number of adolescents employed in factories was 1,170 ; 1,142 of these worked in non-seasonal and 28 in seasonal concerns. One thousand and one hundred sixty-seven of these were male adolescents and 3 female adolescents.

Out of 1,170 adolescents, 1,140 or 97·4 per cent. were reported to have worked as adults and only 30 as children.

11. The average number of women and children employed in factories during the last two years is as follows :

	1940	1939
Women..	4,276	4,803
Children	886	586

Of the 4,276 women workers 2,006 or about 46·9 per cent. were employed in seasonal factories as compared with 49·2 per cent. in 1939.

Of these 671 worked in Tea Factories, 1,312 in Cotton Ginning Factories and the remaining 23 in other seasonal concerns.

The decline in the number of women workers during the year under report continued and was principally due to the introduction of the Maternity Benefit Act when employers preferred dispensing with the services of women workers and employing men or boys instead.

The proportion of women to the total number of workers was slightly more than 2 per cent.

12. The decline in the number of children employed was checked and there was an increase of 300 children during the year under report and mainly due to the reasons given above, and to new employments in new factories started to meet the needs of the Army.

Eight hundred and seventy-eight out of 886 were employed in non-seasonal factories.

The proportion of children to the total number of workers is 0·49 per cent.

Illegal employment of women and children continued to receive the special attention of this Department and but for the conditions arising out of the War a considerable progress could have been reported.

V—Inspections and Visits

13. The number of inspections and visits made during the year was 1,676 against 1,602 in 1939.

Out of the working factories 214 factories were inspected once, 177 twice, 102 thrice, 42 four times, 19 five times, 13 six times, 6 seven times and 5 more than seven times. No factory remained uninspected, for the second year in succession, in the history of this Department.

The following table shows the number of inspections made by the *ex officio* Inspectors of Factories and the Honorary Inspectress of Factories. The Factory Inspectress has devoted much of her time on the inspection of factories under the U. P. Maternity Benefit Act, 1938 :

Designation of officer	1940	1939
District Magistrate	4	15
Sub-Divisional Officers	6	7
Assistant Director of Public Health	2	5
Municipal Medical Officers of Health	149	73
District Medical Officers of Health	85	82
Civil Surgeons	10	18
Divisional Superintendents of Industries, United Provinces ..	1	..
Labour Commissioner, United Provinces	1	..
Labour Officer, United Provinces	1	..
Honorary Inspectress of Factories	4	39
Total	263	239

The above amounts to 263 inspections out of a total of 1,676 inspections and visits. The remainder of which were done by the Assistant Inspector, seven Boiler Inspectors (two of whom were appointed in the month of December only) and the Chief Inspector.

Out of 263 inspections made by all the *ex officio* Inspectors the officers of the Public Health Department were responsible for over 246, which includes 53 visits by the District Medical Officer of Health and Medical Officer of Health for the purpose of examining the drinking water of the wells and pipes situated in the factories.

Many visits were made as usual to unregistered factories with a view to keep a watch on the number of factories which may be avoiding registration, as a result of which some unregistered factories which were not discovered before, were brought on the register.

A number of special visits were made for the purpose of enquiring into the cause of accidents, to verify the compliance of orders issued for fencing, guarding, sanitation, etc. and to see if the provisions of the Act in respect of rest intervals, fixed working periods, and weekly holidays were being properly observed.

The assistance rendered by the *ex officio* Inspectors is gratefully acknowledged.

There is little doubt that the interest of the local *ex officio* Inspectors of factories can be a source of great assistance to this Department and as a check on the factory owner especially in out of way places.

VI—Sanitation and Ventilation

14. Sanitary conditions in most factories were, on the whole, satisfactory and considerably better than a decade ago; but stricter supervision had to be enforced in this connexion by the Inspectors as well as Officers of the Public Health Departments. Out of 654 factories 186 were visited by the officers of the Public Health Department and as a result of the increased attention paid to the factories there appears to have been a material improvement in the sanitary condition.

In a number of cases however warings were issued and attention drawn to the necessity of regularly flushing and cleaning drains and latrines; in one case only was a prosecution instituted for failure to keep the premises in a clean and sanitary condition.

Some factories provided water flush latrines and a few converted their latrines to the water flush system, but no rapid advance in this direction is anticipated till an adequate water-supply is assured for all the major industrial towns in the Province, and the laying of water borne sewage systems.

Extra exhaust fans were also fitted in some factories.

The satisfactory disposal of sugar factory effluent still present difficulties in some areas but on the whole there has been less complaints in this connexion. Orders to deodorise the effluent by the treatment with chemicals were issued where necessary.

There was no further general increase in fitting of air-conditioning plant in the Province. The existence of the present emergency and the difficulties of obtaining plant was undoubtedly responsible for this. At

least 2 factories (1 Cotton Mill and 1 Jute Mill) have however extended their plant.

15. Ventilation continued to improve, it is one of the principal object to receive the attention of the Inspectorate. Natural ventilation was improved where possible by means of additional roof ventilators, sky-lights and windows.

VII—Lighting and Water-supply

16. The use of electric light continued to gain popularity with the factories by means of either their own lighting sets, electric supply companies or grid system, Cases of defective installation and wiring again came to light and I regret to note that defective installation was responsible for two fatal accidents caused by electric shock Particular attention was paid by the Inspectors towards electric installation in factories due to these two sad and unfortunate cases which were brought to the notice of Electric Inspector to Government, United Provinces, for necessary action.

Insprovements in natural lighting were ordered in some cases where it was found possible by providing additional windows or sky-lights but on the whole it was satisfactory.

17. Water-supply for drinking purposes was also found to be generally satisfactory.

In cases where pollution was suspected, the officers of the Public Health Department took samples of water for examination and where it was found defective necessary instructions were issued and the factory managements immediately adopted the remedial measures to remove the pollution.

VIII—Fencing of Machinery

18. There is no requirement under the Act that receives more attention than the safe-guarding of workers. It is treated as a primary duty and a large number of orders were served on factories to fit adequate fencing and guards during the year under report.

In a number of cases prohibitory orders were issued under section 26(2) and in a few cases prohibiting the use of machinery was resorted to instead of prosecution.

The power conferred by this section was used with discrimination and only in cases where danger to human life was apprehended.

A number of warnings were issued and in five cases prosecutions were instituted for failure to provide suitable fencing and guards.

The importance of the use of tight fitting clothings was as usual strongly impressed on the minds of the Factory Managers by the Inspectors; but no general improvement can be reported due to the apathy of the factory owners as well as the workers concerned. Even in cases where the tight fitting clothes are supplied by the employers, many instances were seen where the workers had neglected to wear the same on some flimsy pretext.

It is really surprising to find during inspections that the same guards and/or fencing have to be continually ordered over and over again; because of the carelessness of the workers and the Supervisory Staff.

In may cases the guards are found lying close at hand—having been removed during overhaul or for cleaning.

The apathy of the average worker to his own welfare and safety is at times incredible. There is a case in point where in a rolling mill some of the workers were provided with heavy boots and aprons to prevent them from being burnt by sparks, etc.; and it was found that unless a strict watch was kept on them they neglected to wear them.

19. It is with some degree of satisfaction that at long last one of the local factories (The Luxmi Ratan Cotton Mills) has been prevailed upon to start a "Safety First Committee". This is as far as known the first privately owned factory in the province to start such a Committee; and it is hoped that this lead will be followed by others.

IX—Accidents

20. Three thousand three hundred and forty-eight accidents—41 fatal, 536 serious and 2,771 minor were reported during the year under report as compared with 37 fatal, 447 serious and 2,148 minor in 1939 and were classified as under. Of the 536 serious accidents all but 15 were recorded as such due to injured persons being off duty for 21 days or more:

Textile	No. of accidents
Scutchers	16
Carding	88
Spinning	63
Weaving	218
Cleaning machinery in motion	27
Miscellaneous	408

All other factories (other than Textile Factories):

	No. of accidents
Machine Tools	113
Rolling stock on line	26
Mill gearing and shafting, etc.	11
Belts	52
Miscellaneous machinery	300
Cranes hoist and winches	18
Falling weights	489
Person Falling	223
Tools in use	380
Molten metal	1
Scalds	68
Electricity	11
Burns	151
Gas poisoning	3
Miscellaneous	672
Total	3,348

The number of fatal serious and minor accidents increased by 4, 89 and 623 respectively and thus there was a net increase of 716 in the total number of accidents as compared with the previous year, the incidence per 100 persons employed was slightly more than point two when compared with 1939.

The accidents reported by the Railway Workshops were as follows :

	Fatal	Serious	Minor	Total
1939	..	88	936	1,024
1940	..	103	873	976

It deserves note that no fatal accident occurred in Railway Workshops and the decline in the minor accidents was also maintained. There is an increase in the serious accidents but the total number of accidents has appreciably decreased as compared with that of last year. It would not be out of place to mention here that the formation of the Safety First Committees in the two Railway Workshops at Lucknow has led to this notable decrease in accident in this kind of factory.

The number of accidents in sugar factories went up by 165 as is evident from the following table :

	Fatal	Serious	Minor	Total
1939	12	70	264	346
1940	20	78	412	510

Although sugar factories continued to receive a considerable amount of attention, the number of accidents is comparatively high and includes 20 out of a total of 41 fatalities. Only 6 out of these were due to Machinery and Belts and 5 were due to "Wagon Shunting". "Persons Falling" accounted for 3 and "Falling Weights" and "Electricity" 2 each. The rest were due to "Scalds" and "Miscellaneous".

21. Every possible effort was made to induce the management of big Industrial Establishments to form Safety First Committees and the progress in this direction was not very satisfactory. Safety Posters of various types were distributed to a large number of factories for exhibition in prominent positions inside the Workshops, and their co-operation in getting the workers interested in Safety First methods was asked, but the response was generally unsatisfactory, principally due to bad supervision.

The employers of most of the big Industrial Establishments have begun to realize that a very large percentage of the accidents that occur in the factories are preventible. Such accidents happen very often as the result of carelessness or want of sufficient forethought on the part of the employees principally due to his not having been taught the correct and safe methods of work. The neglect of this primary human act on the part of employers concerned is certainly responsible for very large number of accidents. Such accidents cause as much loss to the employers as they do to the workers involved. It is with this understanding and the propaganda of the department that has led to the formation of one more Safety First

In may cases the guards are found lying close at hand—having been removed during overhaul or for cleaning.

The apathy of the average worker to his own welfare and safety is at times incredible. There is a case in point where in a rolling mill some of the workers were provided with heavy boots and aprons to prevent them from being burnt by sparks, etc.; and it was found that unless a strict watch was kept on them they neglected to wear them.

19. It is with some degree of satisfaction that at long last one of the local factories (The Luxmi Ratan Cotton Mills) has been prevailed upon to start a "Safety First Committee". This is as far as known the first privately owned factory in the province to start such a Committee; and it is hoped that this lead will be followed by others.

IX—Accidents

20. Three thousand three hundred and forty-eight accidents—41 fatal, 536 serious and 2,771 minor were reported during the year under report as compared with 37 fatal, 447 serious and 2,148 minor in 1939 and were classified as under. Of the 536 serious accidents all but 15 were recorded as such due to injured persons being off duty for 21 days or more:

Textile	No. of accidents
Scutchers	16
Carding	88
Spinning	63
Weaving	218
Cleaning machinery in motion	27
Miscellaneous	408

All other factories (other than Textile Factories):

	No. of accidents
Machine Tools	113
Rolling stock on line	86
Mill gearing and shafting, etc.	11
Belts	52
Miscellaneous machinery	300
Cranes hoist and winches	18
Falling weights	489
Person Falling	223
Tools in use	380
Molten metal	1
Scalds	68
Electricity	11
Burns	151
Gas poisoning	3
Miscellaneous	672
Total ..	3,348

The number of fatal serious and minor accidents increased by 4,89 and 623 respectively and thus there was a net increase of 716 in the total number of accidents as compared with the previous year, the incidence per 100 persons employed was slightly more than point two when compared with 1939.

The accidents reported by the Railway Workshops were as follows :

	Fatal	Serious	Minor	Total
1939	..	88	936	1,024
1940	..	103	873	976

It deserves note that no fatal accident occurred in Railway Workshops and the decline in the minor accidents was also maintained. There is an increase in the serious accidents but the total number of accidents has appreciably decreased as compared with that of last year. It would not be out of place to mention here that the formation of the Safety First Committees in the two Railway Workshops at Lucknow has led to this notable decrease in accident in this kind of factory.

The number of accidents in sugar factories went up by 165 as is evident from the following table :

	Fatal	Serious	Minor	Total
1939	12	70	264	346
1940	20	78	412	510

Although sugar factories continued to receive a considerable amount of attention, the number of accidents is comparatively high and includes 20 out of a total of 41 fatalities. Only 6 out of these were due to Machinery and Belts and 5 were due to "Wagon Shunting". "Persons Falling" accounted for 3 and "Falling Weights" and "Electricity" 2 each. The rest were due to "Scalds" and "Miscellaneous".

21. Every possible effort was made to induce the management of big Industrial Establishments to form Safety First Committees and the progress in this direction was not very satisfactory. Safety Posters of various types were distributed to a large number of factories for exhibition in prominent positions inside the Workshops, and their co-operation in getting the workers interested in Safety First methods was asked, but the response was generally unsatisfactory, principally due to bad supervision.

The employers of most of the big Industrial Establishments have begun to realize that a very large percentage of the accidents that occur in the factories are preventible. Such accidents happen very often as the result of carelessness or want of sufficient forethought on the part of the employees principally due to his not having been taught the correct and safe methods of work. The neglect of this primary human act on the part of employers concerned is certainly responsible for very large number of accidents. Such accidents cause as much loss to the employers as they do to the workers involved. It is with this understanding and the propaganda of the department that has led to the formation of one more Safety First

Committee in the Laxmi Ratan Cotton Mills, Cawnpore, in addition to those two already formed at Loco and Carriage Wagon Workshops of the East Indian Railway, Lucknow.

The great bulk of the total number of accidents including fatalities in all clauses of factories was not due to machinery.

Out of 41 fatal accidents 8 were due to "Textile Miscellanous", 3 "Miscellaneous Machinery" "Rolling Stock on the line" and "Scalds" were responsible for 5 and 6 each respectively, "Belts", "Falling Weights" and "Person Falling" 4 each, "Cranes, Hoists and Winches" and "Electricity" 2 each, "Mill Gearing, etc.", "Burns" and "Miscellaneous" accounted for 1 each.

The general increase in the number of accidents is to be deplored; and an analysis of the probable causes is also difficult to arrive at but the following may safely be taken as the principal contributory causes:

(1) Increase in the number of workers employed resulting in some of the trades being 'starved' of trained employees.

(2) Employment of untrained hands in many factories especially those started to meet the requirements of the Supply Department.

(3) Extended hours worked by many factories leading to fatigue.

(4) Better reporting by factories, due to more attention from this Department.

22. Details of the fatal accidents are as follows:

(1) A beltman while putting a belt was entangled between the pulley and belt, sustained serious injuries and died in the hospital the same night.

(2) Ram Lall, cane carrier mate, was standing in front of an empty sugarcane wagon, some coolies moved another wagon loaded with sugarcane, Ram Lall did not notice this and came in between the buffers of the two wagons and got serious injuries. He was at once removed to hospital after rendering first-aid, but he succumbed to his injuries the same night in hospital.

(3) A man failed to put on the belt of his loom; the deceased voluntarily came and attempted to put it on and whilst doing so, he was caught in the belt and dashed against the ceiling; as a result of which he died immediately.

(4) A coolie while engaged on shunting sugarcane wagons came between the buffers and got his left rib fractured. He was removed to hospital where he succumbed to his injuries the next day.

(5) Juglal, beltman, had his coat wrapped on to a revolving shaft while passing nearby and he got entangled in the shaft. The injury resulted in death.

(6) A worker of a sugar factory was found entangled in the unguarded countershaft of crystallizers. His dead body was removed from the shaft.

(7) Three persons Qadim Hussain, Bhainoo and Mino while shifting some bone meal from a godown got injured by the collapse of an adjacent partition wall due to which Qadim Hussain died after about 8 days, but the other two recovered.

(8) A humidifier man had wrapped his ears and neck by a muffler. While he was putting oil in the humidifier fan shaft bearing, accidentally the loose end of his muffler got lapped on the fan shaft and he fell down on the room floor. He succumbed to the injuries the next day in the hospital.

(9) A worker in an oil factory who arrived before his time and was sleeping close to an oil refining open tank which overflowed. He was badly burnt and died in hospital on the 5th day of the accident.

(10) A "Palledar" was engaged at the time of accident in removing sugar bags from the godown when all of a sudden the pile of bags gave way and fell on the injured burying him underneath the sugar bags. He succumbed to the injuries received, after 3 hours in the hospital.

(11) A worker in a sugar factory went inside an evaporator to have a final look if it had been cleaned properly. He got electrocuted and died immediately by coming in contact with the wet wire of an electric lamp which was hung inside the evaporator. The wire had probably got wet by the condensation of vapur.

(12) A fitter was making a joint on the molasses pipe leading to the storage tank and he slipped from there, fell, and banged his head on the ground (a distance of about 20 feet) and died within a few minutes.

(13) A worker whilst filling a leaching pit in a tannery, slipped and fell into a pit containing hot water and was scalded; as a result of which he died in hospital about a fortnight later.

(14) A chaukidar was crushed on 29th February, 1940, between the railway wagon and the cart when he was trying to push the cart which was entangled in the railway line and received serious injuries. He was removed immediately to the hospital where he died next day.

(15) A shunting coolie was caught between the buffers of two railway wagons while attempting to cross the line. He succumbed shortly afterwards to the injuries received.

(16) and (17) A stamp cutter coolie and a paper reeler while carelessly lifting a paper reel from under another and larger paper reel, exceeded the strength of the gantry crane supports causing the crane to collapse and fall on them. One was killed instantaneously, and the other died in hospital the next day.

(18) The deceased while going to fill a tank of hot clear juice with the over flow from the same tank, instead of going through the proper way attempted to cross over the brickwork at the side of the said tank. Unfortunately, his leg slipped and he fell in the tank containing hot juice and got scalded, as a result of which he succumbed to his injuries.

(19) A man was tightening the bolt of a leaking flange inside a vacuum pan, and was holding an electric lamp in his hand. During the course of tightening the said flange, he slipped and fell, and the bulb was broken and as a result of which he was electrocuted, by coming in contact with the wires in the broken bulb.

(20) A wagon coolie was crushed between the buffer of his wagon and that of another wagon pushed from behind by another set of workers, and eventually died of the injuries received the same day in the hospital.

(21) It was reported that Nathoo died of injuries received as a result of a slip into the centrifugal machine of a Sugar Mill, while standing over its outer casing. The reason why he happened to stand there could not be ascertained.

(22) An oilman while oiling the bearing of crystallizer engine was entangled in the belting and died within a few minutes.

(23) Masih Ullah was raising a block of wood for sawing, the block slipped down from the supports (thonias) which caused the fracture of his skull, and he succumbed to his injuries within an hour.

(24) On 29th April, 1940, at about 10.30 p.m., a packing coolie while washing a duster in the boiler blow off pit, slipped into it and died after 20 days in hospital due to having been scalded by the hot water.

(25) The deceased was working at clearing a choked pipe in the agitator, when his co-worker started up the agitator motor. This starting up was unintentional, as two starting buttons were close together and while intending to start up the pump motor he pressed the wrong button and started up the agitator, with the result that his ribs were broken, and he died on reaching hospital.

(26) A coolie while opening a scaffolding that was at a height of 35 feet from the ground floor fell down from there and received serious injuries and was removed to factory dispensary immediately where he died within two days.

(27) A machine man while placing a bunch of twine on a rod near the main driving shaft got his hand entangled in it through the twine being first entangled in the running shaft. His left arm was completely severed from the body He died in the hospital the same day.

(28) A worker of a Waste Factory while working on "Hand worked waste Bailing Press" was struck on the head by the handle of the Press. He died the next day in hospital.

(29) The deceased climbed on to a roof though he was told not to do so till the current in the electric lines passing near by was cut off. He did not wait for the mistry who had gone to pull the switch out; climbed on to the roof and touched the wire to see if it was dead it was not. He died almost immediately.

(30 A girl was sitting under the shade of a tree working with others on opening yarn during a dust storm when a large branch of the tree broke off and fell on her. She received head injuries and died within 6 hours of being admitted to the hospital.

(31) A man climed on the top of a corrugated iron roof to break small twigs from a *neem* tree to use for cleaning his teeth.

He slipped and to prevent himself falling, clutched at a live wire which was about 7 feet above the roof. He was electrocuted, and died on the way to hospital.

(32) A man was working on a truss and lowering a wooden pole, his foot slipped and he fell down and sustained serious injuries as a result of which he died the next day.

(33) Five-inch C. I. Main steam stop valve of Lancashire boiler no. U. P./1916, gave way due to water hammer in the pipe from the place where it was only 5/16″ thick, which occurred when the fireman was opening the stop valve. He was seriously scalded by the sudden issue of steam and died on the 7th day of the accident.

(34) A pile of hot ashes and soot fell on a fireman who was cleaning the bottom flue of a Lancashire boiler, and he was severely burnt all over his body; as a result of which he died in hospital after 12 hours.

(35) A worker was helping in unloading logs one of which slipped and fell upon him. The injured person expired immediately.

(36) Rambasa while passing over a drain slipped into it and her foot got scalded by steam passing into it from the cylinder drain pipes. She was removed to the hospital where she succumbed to the injuries after 12 days of the accident. The accident was due to the drains not having been properly covered.

(37) A worker was killed in a sugar factory by the accidental slip of his foot causing a heavy sleeper to fall on his nose fracturing the base of skull.

(38) Aziz, a khalasi working in the mill house while removing a weight from a mill accumulator got hurt due to the weight falling on his chest and succumbed to his injuries. The accident was due to the carelessness of the Mill-Incharge in not instructing the men to release the pressure before removing the weight.

(39) A worker fell into the hot soaking pit in a plywood factory and was seriously scalded. He was admitted to the hospital where he succumbed to his injuries the next day.

(40) A worker was found dead in a cotton seed heap due to heart failure or suffocation or to some other cause undiagnosed and unknown.

(41) Ajmeri Husain, an oilman while putting a driving belt on a moving pulley was caught in it and succumbed to the injuries in about an hour.

X—Prosecutions

23. Out of the 24 prosecutions shown as pending in the report for 1939, convictions were obtained in 17 cases, while in 4 cases they were acquitted. In one case shown as pending in 1939 an appeal was preferred by the Factory Owners and the amount of fine was reduced to half; an application for revision was again filed in the Honourable High Court but it was rejected. In three cases the judgments are still awaited,

24. Thirty-four prosecutions were instituted by this department against 24 factories in the year under report. The details of these are given below with reference to the main Sections of the Act contravened:

	No. of cases
Section 9 for not submitting notice of occupation	3
Section 13 for not keeping the premises in a clean and sanitary condition.	1
Section 24 for not fencing the machinery	5
Section 33 for not submitting the certificate of stability ..	1
Section 35 for allowing the workers to work in weekly holidays and for not submitting notices of substitution.	2
Section 39 for not displaying the notice of periods for work ..	2
Section 41 for not maintaining the attendance register	4
Section 42 for employing workers outside prescribed hours ..	7
Section 51 for employing children without certificate and token ..	1
Section 56 for not maintaining the attendance of children workers	1
Section 57 for employing children to work outside fixed hours ..	1
Section 76 for not displaying the abstract of the Act and Rules ..	1
Rule 4 for not maintaining and producing the Inspection Book ..	3
Rule 23 for not maintaining the first aid equipment	1
Rule 97(b) for not producing the attendance register	1
Total ..	34

The above is a bare statement regarding prosecutions for infringements of the law. There is however often a "behind the scene" story of a cross-country ride or a visit at some late or early hour to obtain the evidence necessary to obtain convictions.

Convictions were obtained in 17 cases and in 2 cases the accuseds were acquitted and the rest are pending in the Courts.

The fines ranged from Rs.15 to Rs.200 and amounted to a total of Rs 979. In one case the fine was Rs.200 and in 2 cases Rs.100, in three cases Rs 50 and in the remaining 11 cases under Rs.50.

In some cases the amount of fine imposed was very small. With a maximum penalty of Rs.500 prescribed by the Act, the imposition of a fine of less than ten per cent. is not calculated to induce offenders to mend their ways.

Taking protection under section 71 appears to have become "fashionable" and there is no doubt that this section in many cases enables a guilty party to escape. Amendment of this section is clearly indicated so as to give definite directions as to procedure in the Courts.

All the cases except three were instituted as a result of the irregularities detected by this department.

Ten cases for the offences committed in the year under report were instituted in the year 1941 and so the details of these will be shown in the next year's report.

The majority of the prosecutions were launched for the violations of the provisions relating to restrictions on working hours and fencing precautions.

In many cases strict and final warnings were also issued to the factory owners by this department.

XI—Housing of Factory Workers

25. One thousand and seventy-nine quarters, i.e. 784 single and 295 double were constructed by factories in 28 districts during the year under report. They were distributed as follows:

Agra **90**, Aligarh 22, Bareilly 27, Cawnpore **117**, Gorakhpur **194**, Meerut 59, Moradabad 28, Muzaffarnagar 96, Saharanpur 34, Shahjahanpur 180, Sitapur 66 and the balance of 166 in the remaining 17 districts.

Sugar factories have again played an important part in constructing the majority of new housing.

The housing settlement scheme for the workers of the Juggilal Kamlapat Group of Mills is said to be ready, but due to certain unfavourable circumstances it has not yet assumed a concrete shape.

It is again regretted that the Improvement Trust, Cawnpore, have built no quarters for workmen during the year 1940.

The provision of suitable residential quarters at low rents for employees of factories in all the major industrial areas of the Province should be considered to be an essential charge on the employers concerned, but at the present rate of advance it would be a long time before the ideal is attained.

XII—General Health of Workers

26. The general health of the factory workers was good. Cholera and smallpox epidemic cases were however reported to this office from Firozabad and Captainganj factories and cholera in Cawnpore factories.

XIII—Hours of Work

27. In the non-seasonal category the weekly hours of only 7 factories were not more than 42 and in 58 factories they were above 42 but not more than 48 hours. The weekly hours of 358 factories were above 48 hours.

The general increase over last year is due to War conditions. Factories having been granted exemptions, both temporary and for the duration of War.

In the seasonal side the weekly hours of 9 factories were not more than 48, and in 16 factories they were above 48 but not more than 54 hours. The weekly hours of 117 factories were above 54.

Majority of the factories worked to the full limit prescribed by the Act.

Nine prosecutions were instituted by this department for breaches of sections 35 and 42. Convictions have been obtained in 4 cases, the remaining 5 cases are still pending.

The employment of workers in over-lapping shift, particularly in the textile factories continued to increase with the result that the detection of the irregularities for periods of employment was practically impossible.

XIV—Exemptions

28. Temporary exemptions under section 44(2) of the Act from the provisions of sections 34, 35 and 36 were given to a number of factories for their adult workers to deal with an exceptional pressure of work on account of the War.

General exemption for "the duration" under section 8 from the provisions of Sections 34, 35 and 36 of the Act were given by Government to a few Government factories as well as to some of the private concerns employed solely on war work.

Exemption granted to Jute Mills in January, 1940, was however cancelled in November, 1940.

Many requests for exemptions from the provisions restricting hours of employment is being received, mainly on the plea of being employed on war work, and it has added considerably to the undersigned's work to have to verify such requests. Few (if any) of the factories who make such requests appear to have looked at the problem from a scientific angle, and do not appear to have realized that the effect of continued hours of work beyond the optimum is to slow down production, due to the "human factor" in such calculations.

XV—Notices and Registers

29. In most cases the submission of notices was fairly good. Annual returns and notices of periods for work were frequently submitted either incomplete or wrongly filled in and had to be returned for correction. As usual there was delay in submission of the annual returns and many were received at the last moment as a result of which the preparation of the statistical statements appended to this report were delayed.

Six prosecutions were instituted for failure to submit notices of occupation, for failing to display notice of periods for work and for not displaying the abstract of the Act and Rules.

30. The maintenance of registers was on the whole good. Several warnings were however given and eight prosecutions were instituted for not properly maintaining the register of workers and for not producing the Inspection Book.

XVI—Welfare

31. The main items under which the welfare work already in existence in the larger factories were well maintained. In one of the local settlements tea has been provided by the Tea Cess Representatives who have also provided a number of indoor games for the Recreation Room. A new hospital and some new shops were also built. These shops were rented for the sale of the commodities mainly in demand and the prices and qualities are checked by the settlement *panchayat*.

In addition to the children's schools; one of the local factories started a night school for workers and this has proved most popular. In one of the settlements new buildings were provided for boys' and girls' schools. Parks were also provided.

Some factories started provident fund and thrift funds also for the benefit of their workers.

Government Labour Centres appear to be gaining popularity. This matter is fully reported on by the department concerned.

It will not be out of place to mention that the welfare work within the factories in the province has been generally neglected.

A larga group of mills in Cawnpore have started a Newspaper in English and Hindi.

XVII—General

32. Only one case of fire was reported to this office and it occured in a Glass Bangle Factory at Firozabad where all the papers relating to factory work were burnt but no loss of life or injury to any person was reported.

Strikes

33. A few cases of strikes of a short duration were reported from Cotton Mills of Hathras, from one Hosiery Factory of Agra, from one Printing Press of Benares and from one Sugar Mill of Cawnpore and one Jute Mill of Gorakhpur. The details of these strikes as well as of other strikes which have not been reported to this office, have been published elsewhere and therefore they have not been incorporated in this annual report.

Plans

34. Seventy plans were received for scrutiny and approval.

Out of these 57 were submitted under the provisions of the Model By-laws controlling the construction of factory buildings. Out of these 15 were approved and the remaining were returned for modifications. Eleven of these relate to new factories and 46 to additions made in the existing ones.

In examining the plans particular attention was given to height, ventilation, over crowding, sanitation and means of escape in case of fire.

Adoption of Model By-laws framed under Municipal Department G. O. no. 527/XI—152-H., dated the 15th February, 1937, for the construction or adaptation of factory buildings is unfortunately progressing very slowly. Out of 48 district boards and 86 municipalities only 28 and 36 respectively, so far as information is available, have adopted the Model By-laws, with the result that factory buildings all over the province are not uniform. For the sake of uniformity many district boards and municipal boards have been requested to adopt the Model Bye-laws with the result that some boards have adopted the same but it is regretted that some have refused to do so. Unless it is made obligatory on the part of the boards to adopt the said By-laws, the uniformity of the factory buildings in the province cannot be achieved.

35. Eleven plans relating to rest shelters were submitted under Rule 93 of the United Provinces Factories Rules, 1935, and they were approved. Some factories provided rest shelters voluntarily.

Extension of time for the provisions of rest shelter was also given to some factories.

Exemptions from the provisions of rest shelters were also given to a few factories as there were no suitable space available. The introduction of the new Rule 93 had also considerably added to the undersigned's work, as many factories wanted exemption on the false plea of there being no room; and suitable room had to be found and selected by the undersigned.

36. Two plans relating to Baby Créche were submitted and they were approved.

37. No plans of Cotton Ginning Factories were submitted for approval under section 9 of the Cotton Ginning and Pressing Factories during the year.

38. Thirty-three certificates of stability as required by Rule 95 of the United Provinces Factories Rules, 1935, were submitted and out of these 26 were accepted and the remaining ones were returned as the signatories of the certificates did not possess the required qualifications. Seven of these relate to new factories and 19 to additions made in the existing ones.

One factory was also prosecuted for failing to submit the certificate of stability required by this rule and conviction obtained.

39. Special attention was paid to see that the factories are equipped with First Aid appliances. One case was also instituted against a factory for failing to provide the same and conviction obtained.

40. As a new innovation the writer started to hold conferences of Departmental Inspectors in the first week of each month when they were given an opportunity to exchange their views and matter relating to the inspection of factories were discussed informally, with a view to co-ordination of effort by the department and of adopting uniform methods. This has proved very useful as the difficulties ventilated by the Inspectors have been removed.

41. The office which was located in a Government building was again shifted to a rented building, at the close of the year.

42. The co-operation of the Indian Stores Department, the Supply Department, and the Glass Technologist, United Provinces (in designing of improved type of "glory hole" furnaces) is gratefully acknowledged.

43. The conference of Chief Inspectors of Factories held at the beginning of the year 1941 in New Delhi was found to be a very useful medium to discuss difficulties arising from day to day administration of the various Acts; and it is hoped that this will now be regular feature, with a view to promote unformity.

44. The increase in office work has been maintained in spite of increased staff. The work of Chief Inspector has in fact increased to an extent of tying him up in mere normal routine work, and even that has had to be done for long after office hours. Touring has to be done on Sundays and holidays so as not to allow office work to accumulate, and in this way touring to the maximum of the budget allowance was managed.

I hereby record my appreciation of the officers and clerical staff, who have worked well.

Notes on the working of "N" Factories

Under notification no. 1389/XVIII—516-38, dated the 22nd May, 1940, the classes of places known as Printing Presses, Motor Garages, Engineering Works, Glass Bangle Factories, Ice Factories, Brass and Metal Works, and Cotton Ginning and Pressing Factories employing ten or more workers and using power were declared to be factories for purposes of the Factories Act with the exception of sections 15, 16, 33(1) and 33(2).

Prior to bringing the factories on the register, a general survey of all the major industrial centres in the whole province was made and notices under Rule 120 of the United Provinces Factories Rules, 1935, were issued to such concerns as were expected to be "Factories" in view of the said notification, and consequently 76 concerns, i.e. 74 non-seasonal and 2 seasonal concerns employing 899 workers were brought under the purview

of the said Act at the close of the year. It may be mentioned here that the registration of these factories was taken in hand after the new Inspectors took over their duties in December, 1940.

2. The number of workers employed in each class of factories is given below:

	No. of workers
Engineering Works ..	179
Brass and Metal Works	49
Ice Factories	61
Printing Presses	344
Glass Bangle Factories	85
Motor Garages	105
Cotton Ginning and Pressing Factory	76
Total	899

Out of these 823 were adult male workers, 39 women workers, 4 adolescents and 33 children.

3. Number of inspections and visits made during the year to these factories was 497.

Forty-eight factories were inspected once, 22 twice and 5 thrice and one factory remained uninspected as it was registered in December and could not be inspected before close of the year under report.

4. In the non-seasonal category the working hours of 2 factories was not more than 42 and in 21 factories they were above 42 but not more than 48 hours. The working hours of 33 factories were above 48. In the seasonal side the hours of 2 factories were above 54 hours.

Annual returns were not received from 18 factories and therefore their particulars are not included in statement nos. III-A, IV-A and V-A and V-B appended to this report relating to "N" Factories.

5. Nearly all the concerns were registered at the close of the year. Copies of the Act, Rules and forms, etc. were not available to most of them and hence it is too early to make any comment on their working.

Notices of periods for work and annual returns, etc. were submitted either in complete or wrongly filled and had to be returned for correction and re-submission. This entailed a lot of unnecessary correspondence. Many owners and "Managers" are only semi-literate with the result that a lot of correspondence which would otherwise be unnecessary has to be entered into.

During the course of inspections it was found that most of the factories were started in small buildings or parts of buildings. In most cases it was found that a person occupied a room and fixed a lathe or motor and started work, and consequently it was very difficult for them to submit the certificate of stability and plans relating to their factories especially in cases where Model By-laws also applied.

Statistical information available in respect of "N" Factories are appended to this report.

NOTES ON THE ADMINISTRATION OF THE UNITED PROVINCES MATERNITY BENEFIT ACT, 1938

1. The above Act came into force on 1st September, 1939. The year under review is the second year of its enforcement and it may still be considered to be in its infancy.

One-hundred and twenty-one concerns employing **2,304** women workers were subject to the Act.

2. During the year under report a lot of wrong interpretations were received from most of the employers. They thought that since they employed widows and women of advanced age the provisions of the Act would not apply to them.

3. During the course of inspections it was found that this Act has not been properly understood by most of the employers as well as women workers. Every opportunity is taken to explain the main provisions of the Act to the employers as well as to women workers.

Inspections under this Act were made along with the inspections under the Factories Act. One-hundred and nineteen inspections were made under the Act.

4. Only one complaint was received regarding non-payment of the maternity benefit. An enquiry was made into the complaint but it was found that it related to the period prior to the enforcement of the Act and no action could be taken.

5. It may safely be recorded that at the close of the year muster rolls were maintained and the abstracts of the Act and rules were also displayed in most concerns subject to the Act.

The number of concerns maintaining créches were **12**. Most of the créches are maintained at a reasonably good standard and free milk and clothing is also provided. A new circle built by the Juggilal Kamlapat Jute Mills deserves particular mention, but it is regretted that full use is not being made of the facilities provided.

This Act may be said to have proved a "two-edged weapon" for the women workers, as though in cases of factories where women labour was unavoidable, it has done good; the general tendency appears to be to dispense with women labour wherever possible. The result is that the number of women workers have further decreased from **5,119** in **1938** to **4,803** in **1939** and to **4,276** in the year under report.

In the whole province only in three districts the Maternity Benefits have been paid.

The statistical information in this connexion is appended at the end of the report, *vide* Statement IX.

THE EMPLOYMENT OF CHILDREN ACT, 1938

The amended Act came into force on 1st October, **1939**. No returns have been received from the various workshops as required by Section 3B.

The provisions of the amending Act of **1939** were not for various reasons known to the department till the close of the year under repor and no constructive work could be carried out. It is hoped to report some progress during the current year.

Inspectors of Factories have been appointed Inspectors under this Act.

K. K. BATLIVALA,
Chief Inspector of Factories and Boilers,
United Provinces.

STATEMENT I—*Totals of factories*

[Information in respect of Factories as defined in section 2(*j*) of the Act].
